

IsoTech Ink: Cybersecurity Budget Proposal

Enterprise Governance & Risk Transformation Initiative

Prepared By:

Sebastion Mauldin
Cybersecurity Risk & Operations Coordinator
Date: 4/20/2026

Executive Summary

This proposal outlines strategic cybersecurity investments designed to improve IsoTech Ink's governance maturity, monitoring visibility, operational resilience, and risk management capabilities.

The proposed investments focus on:

- Identity and access governance
- Employee security awareness
- Vendor risk oversight
- SIEM visibility improvements
- Incident coordination
- Endpoint and device security

These investments are intended to reduce operational risk exposure, strengthen the organization's overall cybersecurity posture, and improve governance oversight.

Current Operational Risk

The Organization currently faces several cybersecurity challenges, including:

- Elevated phishing exposure
- Inconsistent access control governance
- Incomplete vendor security oversight
- Remote workforce security gaps
- Limited centralized monitoring visibility
- Inconsistent incident coordination procedures

Without additional investment, these risks may increase the likelihood of:

- Operational disruption
- Unauthorized access
- Reputational damage
- Compliance deficiencies
- Data exposure incidents

Proposed Security Investments

Initiative	Purpose	Estimated Cost
MFA Platform Expansion	Strengthen identity security	\$12,000
Security Awareness Platform	Improve employee awareness	\$8,000
SIEM Log Expansion	Improve visibility & detection	\$15,000
Endpoint Security Improvements	Improve device protection	\$10,000
Vendor Risk Assessment Program	Improve third-party oversight	\$5,000

Expected Outcomes

Implementation of the proposed initiatives is expected to:

- Improve phishing reporting behavior
- Increase MFA adoption rates
- Strengthen monitoring visibility
- Improve governance accountability
- Improve executive cybersecurity reporting
- Reduce vendor-related security exposure

Conclusion

Cybersecurity investment is essential to supporting IsoTech Ink's long-term operational resilience, organizational growth, and governance maturity.

Continued investment in governance, employee awareness, monitoring, and identity security will strengthen the organization's ability to manage evolving cybersecurity risks.
