

Company-Wide Security Awareness Announcement

Subject: New Cybersecurity Awareness Initiative

Hello Team,

As part of IsoTech Ink's ongoing commitment to protecting company systems, employee data, and customer information, we are launching an updated Security Awareness & Training Initiative.

This program will focus on:

- Password security
- Phishing awareness
- Safe handling of company information
- Remote work protection

Employees will receive training materials, awareness resources, and periodic phishing simulation exercises to help strengthen our organization's security posture.

Cybersecurity is a shared responsibility, and your participation plays a critical role in protecting the company from evolving threats.

Thank you for your continued cooperation and support.

Sebastion Mauldin
Cybersecurity Risk & Operations Coordinator
