

Risk Prioritization Matrix (IsoTech Ink)			
Risk	Likelihood	Impact	Priority
Phishing Attacks	High	High	Critical
Weak MFA Adoption	High	High	Critical
Vendor Oversight Gaps	Medium	High	High
Logging Visibility Gaps	Medium	Medium	Medium
Remote Work Misconfigurations	Medium	High	High
Policy Governance Inconsistency	Medium	Medium	Medium
Risk Prioritization Summary			
Risks were prioritized based on:			
- Operational impact - Likelihood of occurrence - Potential business disruption - Exposure to sensitive information			
The organization identified phishing exposure, weak access governance, and vendor oversight limitations as the highest-priority security risks requiring immediate remediation.
