

IsoTech Ink: Cybersecurity Governance Charter

Prepared By:

Sebastion Mauldin
Cybersecurity Risk & Operations Coordinator

1. Purpose:

The purpose of this charter is to establish a formal cybersecurity governance framework for IsoTech Ink that supports:

- Operational security
- Risk management
- Compliance oversight
- Strategic security decision-making

2. Governance Objectives:

The cybersecurity governance program aims to:

- Reduce cybersecurity risk
- Protect Organizational assets
- Improve accountability
- Strengthen incident readiness
- Support long-term security maturity

3. Governance Scope:

This governance framework applies to:

- Executives
- Employees
- Third-party vendors
- Remote workers
- Company-owned systems
- Cloud services

4. Leadership Oversight:

Executive leadership will:

- Support policy enforcement
- Review security risks quarterly
- Allocate cybersecurity resources
- Review major incidents

5. Governance Priorities:

Primary priorities include:

- Vendor risk oversight
- Access control governance
- Employee awareness
- Security monitoring visibility
- Incident response readiness

6. Program Ownership:

The cybersecurity Risk & Operations Coordinator is responsible for:

- Maintaining documentation
- Coordinating governance activities
- Supporting risk assessments
- Facilitation security reviews
