Executive Summary

Third-Party Risk Register Summary

IsoTech Ink relies upon multiple third-party vendors to support critical business operations including payment processing, logistics management, cloud storage, employee management, and customer relationship management. Because third-party providers may have access to sensitive organizational information, vendor cybersecurity risk represents a significant component of the organization's overall risk profile. This Third-Party Risk Register was developed to improve visibility, accountability, and governance oversight of vendor-related cybersecurity risks. The register tracks vendor assessments, risk ratings, remediation activities, and review schedules to support ongoing vendor risk management efforts.

Vendor Risk Rating Methodology

Vendor Risk Rating Methodology (IsoTech Ink)	
Risk Tier	Definition
Critical	Direct access to sensitive customer, employee, or financial data
High	Access to internal business systems
Medium	Limited operational access
Low	No access to company systems or data

Risk Score Rating

Risk Score/Rating (IsoTech Ink)	
Risk Score	Rating
80-100	High Risk
50-79	Medium Risk
0-49	Low Risk
