

Security Control Effectiveness Assessment

Assessment Date: June 2026
Organization: IsoTech Ink
Assessment Owner: Sebastion Mauldin
Purpose: Evaluate the effectiveness of implemented cybersecurity controls and identify opportunities for improvement.

Main Assessment Table (IsoTech Ink)						
Control ID	Control Name	Implemented	Effective	Evidence Reviewed	Effectiveness Rating	Improvement Needed
AC-001	MFA Enforcement	Yes	Yes	MFA Adoption Reports	High	None
AC-002	RBAC Access Control	Yes	Partial	Access Reviews	Medium	Quarterly Reviews
AC-003	Privileged Account Reviews	Yes	Partial	Admin Account Audit	Medium	Increase Frequency
AC-004	Remote Access Controls	Yes	Partial	VPN Logs	Medium	Expand Monitoring
AT-001	Security Awareness Training	Yes	Yes	Training Reports	High	None
AT-002	Phishing Simulations	Yes	Yes	Campaign Results	High	Increase Frequency
LG-001	Centralized Logging	Yes	Partial	SIEM Reports	Medium	Add Log Sources
LG-002	Security Alert Monitoring	Yes	Partial	Alert Dashboard	Medium	Improve Detection Rules
LG-003	DNS Monitoring	Partial	Partial	DNS Reports	Low	Expand Coverage
IR-001	Incident Response Plan	Yes	Partial	IR Documentation	Medium	Tabletop Exercises
IR-002	Incident Escalation Procedures	Yes	Yes	Escalation Workflow	High	None
VR-001	Vendor Assessments	Partial	Partial	Vendor Reviews	Medium	Expand Program
VR-002	Vendor Monitoring	Partial	Partial	Vendor Risk Register	Medium	Improve Review Frequency
GOV-001	Governance Charter	Yes	Yes	Charter Documentation	High	None
GOV-002	KPI Reporting	Yes	Yes	KPI Dashboard	High	None

Executive Summary

A review of cybersecurity control effectiveness was conducted to evaluate the operational performance of governance, technical, and administrative security controls. The Assessment determined that most controls are operating effectively and are contributing to organizational risk reduction. Several controls require additional maturity improvements, particularly within vendor risk management, monitoring visibility, and access governance.

Overall Control Effectiveness Rating: 82%
Overall Assessment: Effective with Opportunites for Improvements

Control Rating Legend	
Rating	Meaning
High	Control is functioning effectively
Medium	Control functions but requires improvement
Low	Medium

Key Recommendations

- Expand SIEM log ingestion coverage
- Increase DNS monitoring visibility
- Formalize quarterly access reviews
- Conduct annual incident response exercises
- Expand Vendor review processes
- Improve privileged account oversight

Control Effectiveness Summary

Control Effectiveness Summary	
Rating	Number of Controls
High	7
Medium	7
Low	1
