

IsoTech Ink: Phishing & Social Engineering Awareness Guide

What is Phishing?

Phishing is a social engineering attack where attackers attempt to steal:

- Passwords
- Company data
- Payment information

Through deceptive emails, messages, or websites.

Common Types of Social Engineering

Phishing

Fraudulent emails pretending to be trusted organizations

Vishing

Voice-based scams conducted through phone calls

Smishing

Malicious text messages scams

Angler Phishing

Fake customer support accounts on social media

Red Flags of Phishing Emails

Employees should watch for:

- Suspicious links
- Urgent language
- Spelling errors
- Unexpected attachments
- Login requests

Safe Practices

Employees should:

- Avoid clicking unknown links
- Verify sender identities
- Report suspicious messages immediately
